

Ideation Phase - Brainstorm & Idea Prioritization

Date: 18 June 2026

Team ID: 24EG105H29

Project Name: AuraCare – Smart Healthcare & Telemedicine Management System

Maximum Marks: 4 Marks

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Many patients face difficulties in finding suitable hospitals, booking appointments, consulting doctors remotely, accessing medical records, and obtaining emergency healthcare services quickly. AuraCare provides a centralized healthcare platform for hospital search, doctor consultation, appointment booking, telemedicine, prescriptions, and emergency services.

Step-2: Brainstorm, Idea Listing and Grouping

Idea No	Idea
1	AuraCare – Smart Healthcare & Telemedicine Management System
2	House Rent Management System
3	Online Food Ordering System
4	Student Placement Management System
5	Event Management System

Grouping of Ideas

Category	Ideas
Healthcare	AuraCare
Real Estate	House Rent Management
Education	Placement Management

E-Commerce

Food Ordering System

Events

Event Management System

Brainstorming Mind Map

AuraCare → Hospital Management, Appointment Management, Telemedicine, Patient Services, Emergency Services, Authentication, Administration

Step-3: Idea Prioritization

Criteria	AuraCare
Innovation	5/5
Feasibility	5/5
Technical Knowledge	5/5
Market Need	5/5
Learning Opportunity	5/5
Total Score	25/25

Final Selected Idea

AuraCare – Smart Healthcare & Telemedicine Management System

Reason for Selection

AuraCare was selected because it addresses real-world healthcare challenges by providing an integrated digital healthcare platform for patients, doctors, hospitals, and administrators. The project is technically feasible using the MERN Stack and provides opportunities to implement React.js, Node.js, Express.js, MongoDB, JWT Authentication, Role-Based Access Control, Telemedicine Services, Prescription Management, and Emergency Healthcare Support.
