

Project Design Phase - Problem Solution Fit Template

Date: 18 June 2026

Team ID: 24EG105H29

Project Name: AuraCare – Smart Healthcare & Telemedicine Management System

Maximum Marks: 2 Marks

1. Customer Segments

Patients, Doctors, Hospitals, Healthcare Administrators and Emergency Service Users.

2. Jobs To Be Done / Problems

Patients need quick hospital discovery, appointment booking, telemedicine consultations, prescription access and emergency healthcare support.

3. Triggers

Medical emergencies, need for specialist consultation, appointment scheduling, health record management and remote healthcare access.

4. Existing Before / After

Before AuraCare, patients relied on manual hospital visits and disconnected healthcare services. After AuraCare, healthcare services are available through a single digital platform.

5. Customer Constraints

Long waiting times, lack of centralized healthcare information, limited emergency support visibility, and difficulty accessing medical records.

6. Available Solutions

Traditional hospital systems, phone-based appointment booking, and multiple independent healthcare applications.

7. Problem Root Cause

Healthcare information and services are fragmented across different platforms, causing inefficiency and delays.

8. Behaviors

Patients search online for hospitals and doctors, compare healthcare services, seek telemedicine options and require digital healthcare access.

9. Your Solution

AuraCare provides hospital search, doctor booking, video consultation, digital prescriptions, health records management, emergency ambulance requests and appointment reminders in one platform.

10. Channels & Adoption

Web application, online healthcare services, hospital partnerships, digital healthcare awareness campaigns and telemedicine adoption.
