

Project Design Phase - Proposed Solution Template

Date: 18 June 2026

Team ID: 24EG105H29

Project Name: AuraCare – Smart Healthcare & Telemedicine Management System

Maximum Marks: 2 Marks

S.No	Parameter	Description
1	Problem Statement (Problem to be solved)	Patients face difficulties in finding hospitals, booking appointments, accessing telemedicine services, managing medical records, and obtaining emergency healthcare support efficiently.
2	Idea / Solution Description	AuraCare is a MERN Stack based healthcare platform that provides hospital search, doctor booking, video consultation, digital prescriptions, health locker management, ambulance assistance, and appointment reminders.
3	Novelty / Uniqueness	Combines telemedicine, hospital discovery, emergency healthcare services, prescription generation, and health record management into a single integrated platform.
4	Social Impact / Customer Satisfaction	Improves healthcare accessibility, reduces waiting times, enhances emergency response, and provides convenient digital healthcare services for patients.
5	Business Model (Revenue Model)	Revenue can be generated through hospital partnerships, premium

		healthcare subscriptions, telemedicine consultation fees, and healthcare service integrations.
6	Scalability of the Solution	The system can be expanded to support more hospitals, doctors, healthcare services, AI-based healthcare recommendations, mobile applications, and cloud deployment.
